VIA

The foldable electric wheelchair

The Via will set you on new paths. This foldable electric wheelchair can become your daily companion for whenever you need support. It is primarily designed for use in your home.

The Via's compactness makes it very manoeuvrable. This means that you can easily navigate around furniture, corners and edges throughout your entire house. Its integrated folding mechanism makes the Via extremely easy to transport. It can be folded in a flash and fits comfortably in the boot of a car. This means you can take the Via with you wherever you go to support your mobility: to the shopping centre, when attending a doctor's appointment, on a trip to the park and, of course, when meeting up with your loved ones. If you don't need the Via, simply fold it up. It is extremely space-saving and practical because the Via is easy to push even when folded, yet still remains stable when left standing.

The Via brings flexibility to your everyday life, but it can also join you on holiday. As a foldable electric wheelchair, it can also accompany you on trips by bus or train. You can even ride the Via comfortably on bumpy surfaces, such as old cobbled streets, thanks to its larger tyres (12.5-inch pneumatic tyres). The Via can roll easily over obstacles of up to four centimetres. The Via is powered by a maintenance-free lithium-ion battery which provides a range of approximately 22 km and allows you to reach a speed of 6 km/h.
